

# Welcome to AP Computer Science!

Please go to [codehs.com/go/F544B](https://codehs.com/go/F544B) and create a student account with the class code 5F44B. Your summer assignment is to complete the Introduction to Programming in Java with Karel the Dog. You'll learn how to start coding and have some fun with the challenges. You'll earn points in class based on how far you got. If you get stuck or can't complete a few parts, bring those questions to class in the fall and we'll figure them out. If you happen to be awesome at this and you finish the Introduction with Karel, keep going into the other sections. Good luck and I can't wait to see you in August!
