

Welcome to AP Stats!

Please go to <https://www.khanacademy.org/math/statistics-probability/ap-statistics?t=practice> and sign in with your D230 google account (top right corner). They have a new AP Statistics course in development! We'll work towards completing this to 100% throughout the year. This summer I'd like you to focus on Analyzing Categorical Data and Analyzing Quantitative Data.

Analyzing categorical data >

Up next: Reading two-way frequency tables

Analyzing quantitative data >

Up next: Reading dot plots & frequency tables

If you are able to finish both of those, keep going into the other sections. Try the Explore and Practice tabs. The further you get in the summer the more credit you can earn!

< MATH | STATISTICS AND PROBABILITY

AP Statistics (in development)

Explore **Practice**

Also, go to your profile, click on coaches and type in the following class code: **E7KEXE**

Good luck and I can't wait to see you in August!

Mr. Rosenthal
